**DETAILED ACTION**

1. Applicant's election without traverse of Species III, claims 21, 24, 26-28, and 31 in the reply filed on 09/07/2004 is acknowledged.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 21 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. "a docking device" lacks positive identification. It is not distinct whether the docking device is in fact part of the claimed combination. Therefore, the docking device must be positively identify as being part of the claimed combination of elements.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 21, 24, 26-28, and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kulakowski et al. 6,731,455 in view of Stefansky 5,329,412.

Kulakowski '455 discloses a data storage library per claimed invention. The library comprises a plurality of storage areas for housing plurality of hard disk drive devices (HDD, see Figures 1A and 4). Each of the hard disk drive devices comprises a

power supply (Figure 1A). The library comprises robotic grippers 62 for gripping and moving said HDD 's (Figures 2 and 3) from/to said storage areas. The library comprises a host device 72 (Figure 2) for controlling the library operations. The library comprises plurality of interfaces for communicatively linking or docking the HDD 's to the host device (Figures 2, 3, and 4). Kulakowski '455 data storage library is also capable of handling tape cartridges or a combination of tape and hard disk drive devices (column 11, lines 21-47). However, Kulakowski '455 is silent as to the specific of the HDD having form factor in the shape of a tape cartridge.

Stefansky '412 discloses a portable hard disk drive device. Stefansky '412 teaches that the hard disk drive device housing can have the dimension of a tape cartridge (column 1, lines 55-61).

It would have been obvious to one having ordinary skill in the art at the time of the invention was made to have the housing dimension of Kulakowski '455 HDD coincides with the housing dimension of a magnetic tape cartridge, as taught by Stefansky '412, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F .2d 272, 205 USPQ 215 (CCPA 1980). Furthermore, it would have been obvious for one of ordinary skill in the art to have provided Kulakowski '455 HDD with a housing having the same dimension of a magnetic tape housing because such HDD cover had been known in the art, as demonstrated by Stefansky '412.

In regards to claims 24 and 31, Kulakowski '455 discloses all elements per claimed invention as explained above. However it is silent as to the specifics of the HDD having form factor in the shape of a Digital Linear Tape (DLT).

It would have been obvious to one having ordinary skill in the art at the time of the invention was made to have the housing dimension of Kulakowski '455 HDD coincides with the housing dimension of a Digital Linear tape cartridge since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F .2d 272, 205 USPQ 215 (CCPA 1980).
